Interface:	20
State Machine / Parse Tree	
load table	
make table / insert values	
select fields / * where	
join	
This solution must be scalable.	
Functionality:	30
Loads(**multiple**) tables from file	
select fields / * where col = str	
inserts rows into tables	
makes new tables	
join tables	
select where col >= str	
select where col in range	
Serialize B-Tree	
Under the hood:	50
Internal storage:	
B-Tree	
B+ Tree	
Map class	
private B-Tree	
Table class <B/B+ tree Maps>	
Stored as columns	
Stored as rows	
indices	
sql class	
manages **multiple** tables (hash / Map)	
inputs and parses commands	
Interpreter
